Career Objective

To contribute to a forward-thinking company as a Frontend Developer by applying my experience in React and Next.js, while continuously expanding my skillset and creating impactful digital experiences.

Professional Experience

Frontend Developer – Avemas Studios
2022 – 2024

- Built fast and scalable projects for clients using Next.js and other frontend technologies
- Translated Figma designs to responsive and user friendly interfaces
- Worked with API's to ensure dynamic and data-driven experiences
- Participated in code reviews and product testing
- Maintained and refactored code to ensure performance, readability, and scalability

Auxiliary Staff – CSS (Connect Surf and Smile) Fiber
2024 – 2025

- Gained hands-on experience with networking equipment such as routers, access points, servers, and ONTs.
- Developed an understanding of radio and fiber network infrastructure, billing systems, and client support procedures.
- Learned fiber optic cable splicing and basic troubleshooting techniques.
- Configured TP-Link routers and ONTs for customer use.
- Assisted in the setup and installation of fiber networks for residential and commercial clients.
- Participated in fieldwork, including running fiber optic cables from splitters to customer premises and across network segments.

Office Assistant to the Procurement Officer / Project Manager
Government Technical College, Port Harcourt
2017 – 2022

- Prepared and maintained procurement documents using Microsoft Word and Excel.
- Assisted in compiling and organizing internal auditing documents.
- Created presentation materials and reports for internal and external use.
- Provided general office support and document management across multiple projects.
